Subject: Facet Solar Mount by Enable Energy

To Whom It May Concern:

This is to confirm that the Facet solar mount attachment system by Enable Energy may be used with the GAF EverGuard® TPO roof system as an attachment point, for roof mounted equipment systems, provided that it is flashed by a GAF master or master select contractor and all current GAF application requirements are followed and guarantee procedures are met.

This letter only refers to the compatibility of the Facet solar mount attachment system by Enable Energy with the GAF roofing system. This is not an endorsement or representation of any warranty regarding the overall performance of the Facet solar mount attachment system itself. Any movement of the Facet solar mount attachment system causing cracking or failure of the water tightness of the GAF EverGuard® membrane roof system is not covered by the GAF guarantee.

If you have any further questions, please contact us at 1-800-766-3411; follow the prompts to technical service.

Sincerely,

Bill Broussard
